The Advantages of a

Trust Company

For years prudent men and women have recognized

that a Trust Company was the only logical Administrator or Trustee of estates, and for that reason each

year sees more and more Trust Companies appointed

In this connection it is worthy of note that the late Melville W. Fuller, Chief Justice of the United States,

appointed a Trust Company as Trustee under his last Will and Testament, which fact should convince every

thinking man and woman that there is no question

VIRGINIA TRUST

COMPANY

of Richmond, Va., is the logical and proper Executor

Consultations and correspondence on this subject

JAS. N. BOYD, First Vice-President. JNO. M. MILLER, Second Vice-President.

but that a strong Trust Company, such as the

H. W. JACKSON, President.

JNO. H. SOUTHALL, Treasurer.

L. D. AYLETT, Secretary.

to such capacities.

or Trustee of estates.

cordially invited.

Market Shows Pronounced Strength, Although Business Is Dull.

CROP REPORT NOT GOOD

'America Cannot Hope to Export as Much Grain as Last Year.

[Special to The Times-Dispatch.] New York, August 13 .- Pronounced strength was seen to-day in the stock market, although business was dull

strength was seen to-day in the stock market, although business was dull. The short interest seemed hungry as ever and in addition to that considerable odd lot buying was in evidence. The close was firm with substantial gains in all standard shares. Union Pacific and United Staces Steel were favorites. The selling of Smeiters stopped suddenly, and the stock recovered sharply. Official assurance was given that the dividend will not be reduced at the next meeting.

Cash incrased \$10,355,700 in the local banks, according to the statement of their actual condition. Loans increased \$20,751,400, and deposits \$41,289,800. The banks now have a reserve of 20,37 per cent and a cash surplus above legal requirements of \$55,873,625. They are ready to handle any emergency that may arise as a resuit of the Western banking situation. Reports on the crop and on the copper and steel industries, together with annual reviews of the great railway systems of the country, gave Wail Street a fair picture last week of the condition of business in the United States. Judging by the course of prices at the close of the week, this picture seemed fairly pleasing! The increase of operating cypenses shown by most roads was noted more than the increase of operating expenses shown by most roads was noted more than the increase of operating expenses shown by most roads was noted more than the increase of operating expenses shown by most roads was noted more than the increase of operating expenses shown by most roads was noted more than the increase of operating expenses shown by most roads was noted more than the increase of operating expenses shown by most roads was noted more than the increase of operating expenses shown by most roads was noted more than the increase of operating expenses shown in picture is seemed fairly pleasing! The crop report in general was disappointing, although it promises abundant food for this country. The copper report proved that the output is being restricted, and it is understood that restricted, and it is unders a natural result, the stock of the American Smelting Company began an important decline. The weakness of this stock was the most important technical feature of the week, but had little influence on the list.

Report Not Fistering.

According to the government report, indications are not a corn crop of about 2,900,600,000 bushels. This is about the same as indicated last year on the first of August by the govern-

a natural result, the stock of the American Smelting Company began an important decline. The weakness of this stock was the most important technical feature of the week, but had little influence on the list.

Report Not Flattering.

According to the government report, indications are not a corn crop of about 2,900,000,000 bushels. This is about the same as indicated last year on the first of August by the government, but the actual deterioration in any latter in a par with that. But whether conditions are better and a final crop about equal to that of last year to be on a par with that. But whether conditions are better and a final crop about equal to that of last year is 5 fper cent. Sreater than last generally expected. Considering the increased acreage, this is not flattering.

The wheat crop promises to be 660,—

The wheat crop promises to be 660

Chino Copper, Consolidated Arizona
Ohio Copper.

In the closing dealings quotations held very close to last night's finals.

There was no special feature in the miscellaneous department. American Tobacco sold at 400, an unchanged price, and Standard Oli changed hands at 605.

Cotton futures opened steady and closed price, and Standard Oli changed hands at 605.

September 15.70 is 70 is 7

generally expected. Considering the increased acreage, this is not flattering.

The wheat crop promises to be 650, 000,000 bushels for both varieties of grain. Counting stocks in farmers hands and in the warehouses, the total supply of wheat this year will be 146- (00,000 bushels, compared with 770, 000,000 bushels, compared with 770, 000,000 a year ago. Last year the exports were \$7,000,000 bushels, so what this year America cannot hope to export more than \$60,000,000.

Western bankers are repenting of their unwise loans made early in the season, and are doing a still more unwise thing by foreing the farmers to rush the grain to market. This will have a tendency to mislead the general public as to the abundance of the cereal, and will give the farmers a smaller price for their crop than itey might otherwise have received. As the balance of the trade is heavily against America, it is a serious matter to force American farmers to market their great export crop at less than might be had for it.

Figures for July show that exports of agricultural products from portions of the United States were the smallest since 1904, being only \$30,000,000 for the month.

Imports of manufactured articles are still far in excess of exports. With the new cotton crop coming into market, the balance should be corrected sharply, for before the first of January at least 6,000,000 bales must go abroad. The cotton crop, however, is another disappointment, and experts do not contain the state of the state of the cotton crop, however, is another disappointment, and experts do not cotton crop, coming into market. New Orleans. La., August 13.—Cotton—Putures opened steady at a decline of 40 6 points on week-end liquidation by bulls. Cables were about as expected, and the bulls saw nothing in the weather map to cause them to enter into fresh purchases. Prices at the end of the first hour's trading was 567 points under yesterday's closing. The market grew week around the middle of the morning under increased selling from both sides. Reports were circulated that much of the cotton being brought int oTexas was destined to be entered on August contracts in New York, and that the first notices would be issued Monday. This caused considerable uneasiness among longs and they let go freely. Closing bids: August, 14,59: September, 13,76; October, 13,27; December, 13,30; January, 13,36; March, 13,47 May, 13,56.
